Abstract

The purpose of this study is to investigate the effects of production planning notes. The results are as follows:

- 1) The effects of production planning notes on the production time and the improvement of the skills are not found.
- 2) Production planning notes are effective for students' understanding of production and autonomous production study.
- 3) The production planning notes can stimulate students' interest thus it is worthwhile to conduct production study for students.

Key words; production planning notes, production learning, homemaking education, elementary school
